

**Amendments to the Specification**

Please **add** the following **new** paragraph at page 1, line 3:

This application claims the benefit, under 35 U.S.C. § 365 of International Application PCT/FR04/03104, filed **December 2, 2004**, which was published in accordance with PCT Article 21(2) on August 11, 2005 in French and which claims the benefit of French patent application No. 0315629, filed December 31, 2003.

Please **replace** the paragraph beginning at page 3, line 21 (of English translation) with the following **rewritten** paragraph:

The screen is ~~characterized in that~~ wherein the addressing control means are intended to set a bias voltage either at said first current modulator or at said second current modulator, said bias voltage having an opposite polarity to the polarity of said addressing voltage.

Please **replace** the paragraph beginning at page 5, line 25 (of English translation) with the following **rewritten** paragraph:

Another subject of the invention is an addressing method for a display screen of this type, ~~characterized in that~~ wherein it includes for the driving of each light emitter:

- a phase for activating the first addressing circuit in order to supply current to the light emitter;
- a phase for biasing the second addressing circuit in order to shift the trigger threshold voltage of the second modulator;
